JUMP FROM TRAIN SAVES LIVES

ENGINEER ZIESER AND FIREMAN WELDER INJURED.

BOTH ENGINES DESTROYED

An Open Switch Causes Wreck That But for Fortune Would Have Cost Two Lives.

The St. Louis, Brownsville & Mexico train due to arrive here at 7:55 last night ran into an open switch after crossing the local yards and in a head-on collision with the Texas Mexican engine 492, which was standing in the yard. Engineer Zieser and Fireman Welder, of the Brownsville crew were injured.

Only the fact that the train was running slow, at the time, making about 10 miles per hour, and the further fact that both Engineer Zieser and Fireman Welder jumped from the cab of the engine in the ground, saved their lives. The train was in charge of Conductor Franklin and did not reach the local yards until 10:30, being 25 minutes late.

"We saw the lights clear ahead of us and made for the turn and would then have backed into the stalled tracks," said Fireman Welder. "The switch was open and seeing that a collision with the Texas Mexican engine standing on the tracks was inevitable we jumped."

The Brownsville engine completely demolished the Texas Mexican engine and both engines are a complete wreck. The trainmen jumped while about 10 yards before the two engines met. The train which consisted of a baggage car, two day coaches and a sleeper did not leave the track and no passengers were injured.

The injured members of the Brownsville crew were at once taken to the station and Doctors P. D. Spohn, A. E. Spohn and H. H. Redmond were summoned. Engineer Zieser had a dislocated knee as a result of the jump and Fireman Welder a badly strained wrist, from the same cause. Both of the injured men live at Kingsville and will be taken to that place on this morning's train.

The train was taken out at 11:50 by Engineer Chase and Conductor Whitton to Houston, where another crew and engine made the trip to Houston.
